

0.001 Resolution and Data Logging pH Benchtop Meters

- Up to five point pH calibration with seven standard buffers
- Calibration expiration reminder
- Manually log up to 100 records
- Interval log up to 500 records (HI 2215)
- GLP features
- PC interface via USB

HI 2214 and HI 2215 are pH and ORP benchtop meters offering five point calibration. A relative mV feature is also provided. HI 2215 adds 0.001 pH resolution and interval logging.

These instruments can take measurements using ORP electrodes (pH channel input) due to their capability to measure mV with a resolution up to 0.1 mV.

Both instruments provide GLP capabilities to allow the storage and retrieval of all data regarding pH and relative mV calibration.
